- *2-line LCD operator display ensures accurate operations*
- *99 pre-programmed departments*
- *1,800 price look-ups (PLUs) for quick and accurate entry*
- *RS-232 interface for on-line capability*
- *Locking cash drawer with 5 bill and 8 coin compartments*

The User-Friendly ECR that Helps You Keep Track of Business

Keeping track of sales transactions can be a cumbersome task, even for the smallest of shops. That's why the XE-A301 features an abundance of PLUs (price look-ups) and department keys to accommodate a variety of merchandise items. This increases both the speed and accuracy of the checkout process and allows your business to manage a wider variety of goods and services more efficiently. Plus the XE-A301's clear display and speedy operation ensures your sales transactions can be performed quickly and smoothly.

Quick and Quiet Thermal Printing

Featuring thermal printing technology, the XE-A301 silently prints out sales receipts at a speedy rate of about 13.3 lines a second.

Printing of graphics, such as a business logo, is also possible. Transactions are recorded onto two separate tape rolls — receipt and journal — for easy sales management.

Clear Display for User-Friendly Operation

A brightly lit 2-line LCD operator display makes it easy to operate the machine, even in low-light environments. It can display up to 16 alphanumeric characters, allowing clerks to view the names of purchased items and other information in an easy-to-understand fashion.

Abundant Departments and PLUs

Standard equipped with 1,800 PLUs (price look-ups), the XE-A301 makes entering pricing information a snap. By simply entering the code for the items being purchased, you can total up sales with increased accuracy and speed. A total of 99 department keys are also available, allowing you to easily track and analyse transactions by product type. These key entry functions make it easy to manage a large number of products, allowing your business to maintain a product lineup that meets customer demand.

Convenient PC Connectivity

The XE-A301 comes standard with an RS-232 interface port for easy PC data transfer. You can program department and PLU data on a PC and download it to the XE-A301.

Note: Special department/PLU programming software is required; availability depends on region.

High-Capacity Metal Cash Drawer

The XE-A301's space-efficient cash drawer takes up minimal counter space yet generously provides five bill compartments and eight coin compartments. When not in use, the ruggedly built drawer can be locked shut, keeping your money safe.

Other Key Features

- Logo printing (24 alphanumeric characters x 6 lines)
- 20 cashiers standard
- Tax (VAT) shift function (4 rates)
- Training function
- Prints out receipts in English, German, French or Spanish
- Auto paper feed and convenient paper cutter
